Attorney Docket 089367-0123

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Tomohiro SAKAI

Title: DISK ARRAY DEVICE

Appl. No.: 10/781,709

Filing Date: February 20, 2004

Examiner: Unassigned

Art Unit: 2651

INFORMATION DISCLOSURE STATEMENT
UNDER 37 CFR §1.56

Mail Stop AMENDMENT

Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

Sir:

Submitted herewith on Form PTO/SB/08 is a listing of documents known to applicant in order to comply with applicant's duty of disclosure pursuant to 37 CFR §1.56.

A copy of each non-U.S. patent document and each non-patent document is being submitted to comply with the provisions of 37 CFR §1.97 and §1.98.

The submission of any document herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicant does not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any document which is determined to be a *prima facie* art reference against the claims of the present application.

TIMING OF THE DISCLOSURE

The listed documents are being submitted in compliance with 37 CFR §1.97(b), before the mailing date of the first Office Action on the merits. Therefore, no fee is believed to be due.

STATEMENT

The undersigned hereby states in accordance with 37 C.F.R. § 1.97(e)(1) that each item of information contained in this Information Disclosure Statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three (3) months prior to the filing of this Information Disclosure Statement.

RELEVANCE OF EACH DOCUMENT

Documents B2-B5 were cited in an office action in a corresponding Japanese application. Document B1 is in English. Document B2 corresponds to B1.

A translation of a portion of a Japanese office action that issued May 24, 2005 with respect to the counterpart Japanese patent application is provided below.

(Claims 1, 2, 4 through 7, 9, 10, 12, and 13) Cited Examples 1 and 2.

Cited Example 1 (see especially the description of the second embodiment) describes an array input/output device wherein a decommissioning determination device having a counter for each disk is provided in an array controller; when a disk device is operated, a counter is incremented if access succeeds and is decremented if an error subject to retry occurs; and when the counter goes below a specific value, the corresponding disk device is decommissioned.

Furthermore, Cited Example 2 (see especially the description relating to Figure 2 and Figure 3) describes a disk array device wherein the value assigned to each magnetic disk in a cumulative timer table is incremented if a fault leading to data transfer delays, such as an anomaly of the medium, occurs in the magnetic disk, and is decremented while [the disk] is operating normally, and when the cumulative value exceeds a threshold, the corresponding disk device is disconnected.

Both of these involve technology relating to disk array fault handling, and combining the techniques of Cited Example 1 with the techniques of Cited Example 2 is a matter which could be easily conceived of by a person skilled in the art.

(Claims 3 through 7, 11, and 14) Cited Examples 1 through 3

Cited Example 3 describes a technique whereby, in a paired disk device forming a mirroring arrangement, the number of errors is retained for each disk, and the magnetic disk device with the lowest number of errors is selected for access.

Applying the technique of Cited Example 3 to the disk array devices of Cited Examples 1 and 2 to arrive at the arrangement of Claim 3 of the present application is found to be something which could be easily conceived of by a person skilled in the art.

No reasons for rejection have been discovered as of now for inventions according to claims other than the claims indicated in this notification of reasons for rejection. If any reasons for rejection are newly discovered, a notification of reasons for rejection will be issued.

List of Cited Literature

1. Japanese Unexamined Patent Application Publication H11-194898
2. Japanese Unexamined Patent Application Publication 2001-256000
3. Japanese Unexamined Patent Application Publication H08-202501

Record of Prior Art Literature Search Results

• Fields searched IPC 7th Edition
 G06F 3/06–3/08
 G06F 12/00

• Prior art literature

1. Japanese Unexamined Patent Application Publication 2002-149500 (describes a disk array device wherein a counter is incremented upon each occurrence of a fault recovered from in a specific period of time, and the disk device is determined to have failed when the counter exceeds a threshold value)

This Record of Prior Art Literature Search Results does not constitute a reason for rejection.

Applicant's statements regarding the Japanese Office Action are based on a translation that applicant's representative obtained. These statements should in no way be considered as an agreement by applicant with, or an admission of, what is asserted in the Japanese office action.

English language translations or English language counterparts of documents B3-B5 are not available; however, English language abstracts are provided herewith. The absence of translations or English language counterpart documents does not relieve the PTO from its duty to consider the submitted documents (37 CFR §1.98 and M.P.E.P. § 609).

Applicant respectfully requests that the listed documents be considered by the Examiner and formally be made of record in the present application and that an initialed copy of Form SB/08 be returned in accordance with MPEP §609.

Should additional fees be necessary in connection with the filing of this paper, or if a petition for extension of time is required for timely acceptance of same, the Commissioner is hereby authorized to charge deposit account No. 19-0741 for any such fees; and applicant hereby petitions for any needed extension of time.

Respectfully submitted,
